

REVERSE GARBAGE

Early Learning Creative Reuse Workshops

A visit from Reverse Garbage specialist reuse educators is a great way to engender a sense of belonging to a wider community, a community that embraces curiosity, creativity, cooperation, socially responsible and respect for the environment. Our workshops align with the Early Years Learning Framework for Australia.

Children have an opportunity to investigate, hypothesize and experiment with a wide variety of materials. We help them to develop fine and gross motor skills in a playful and inclusive environment.

NOISEMAKERS

Make: Make yourself heard and turn junk into noise makers. Learn how to create sound using a piece of string and a bottle or make a shaker that rattles and rolls wherever it goes.

Develop: An understanding of sound amplification, basic construction skills.

Under the Sea

Make: Travel into the depths of the ocean to transform trash into your own sea creatures and treasures. You might make a clown fish, a sea-junk necklace or a jelly fish puppet.

Develop: Innovative waste minimal construction techniques – this is a tape and glue free workshop reinforcing tying, threading and lacing techniques.

Custom Themed Workshops are available on request for an additional fee.

All workshops run for 1 hour and cost \$250 for 1 session or \$400 for 2 sessions (of the same workshop) in a day.

For Bookings:

Fill out the workshops booking form on our website or email the form on the back to education@reversegarbage.org.au or call the education coordinator on 9569 3132.
